ganization to comprehend its philosophy .-If you will classify the lawyers of your acquaintance under four heads -lawyers of eminence; lawyers of respectability; lawyers of mediocrity, and lawyers of interiority, you will be able to judge how many of them have mistaken their profession. Among all the dangers which threaten

this country, I know of none so great as that which srises from the greed of small men for office and the ease with which they obtain it. When the good and worthy men of a nation like this-men who do not need office but whom the office sadly needs-become disgusted with politics because of the inferior society and undignified contests into which it introduces them, the country may well tremble with apprehension. Let a man who is unfitted by individual-

ity to hold an office, occupy it for come time, and he will be spoiled for the place in which he belongs. The country is full of such wrecks of men as these. It matters little by what mode a man develops his power, or by what path he finds his place in the world, provided he successfully does both. I care not whether your hand be hard or soft; I care not whether you be from the office or the shop; I care not whether you preach the everlasting Gospel from the pulpit or swing the hammer over the blacksmith's anvil I care not whether you have seen the inside of a college or the outside; whether your work be that of the head or of the hand; whether the world accounts you noble or ignoble; if you have found your place you are a happy man. Let no ambition ever tempt you away from it, by so muck as a question ing thought. I give you joy of your good fortune; for if you do the work of that place, and draw from it all that it can give you of Store. nutriment and development, you are a men filled up-made after God's pattern-the noblest product of this world-s self-made
